

Forget the stereotypes. Accountants make great money because...they know money. Our Bachelor of Accountancy program gives you the skills and ethics you'll need to boost your bottom line. You'll learn how to be a public or private sector leader and a decision-maker in global business, government, and not-for-profits. Plus, your coursework will put you steps ahead if you want to get your CPA—fulfilling 120 of the 150 required hours for most state certification exams. Service-learning opportunities will put your skills to real-world use drawing upon a uniquely qualified faculty with nearly a century of combined industry experience.

This is the place.

There's no better place than New Orleans to study business. Having been ranked in the top 100 cities on Forbes' list of "The Best Places for Business and Careers" and gotten the highest rating of any city in Louisiana, New Orleans is quickly becoming a hub for entrepreneurs. In the last decade, a number of tax and job incentive programs have brought a boom of startups and new businesses—and they all need people like you.

You'll participate in our business portfolio program, which offers networking events, resume workshops, mock interviews, job and internship searches, advising, degree checks, and more. Additionally, all of our students graduate with internship experience from real businesses and organizations, so by the time you're looking for a job—you'll have already had one. Our combination of experienced faculty, state-of-the-art facilities, and hands-on programs imparts real-world preparation onto our graduates.

Courses

With a combination of accounting courses and core business curriculum from the economics, marketing, management, and finance departments, our program will train you to be both an effective accountant and a business leader.

Financial Accounting for Decision Making

This course will introduce students to accounting and demonstrate the importance of accounting to society and their future careers. Students will understand the essential financial components of businesses and realize that accounting is imperative in decision making for investors, creditors, management, and others.

Managerial Accounting for Decision Making

This course covers uses of accounting for managerial decision making to aid planning and control activities in business enterprises. Topics include methods for determining the costs of products and services, for assessing product and project profitability, and for budgeting and monitoring costs and profits.

Tax Accounting I

This course examines the concepts and methods of determining federal income tax liability for individuals. Topics emphasized include personal deductions, capital gain and loss provisions, and accounting methods.

Accounting for Public Sector Entities

This course studies accounting, budgeting, fiscal processes, and the financial records of governmental agencies and non-profit organizations. Fund accounting is introduced and emphasized.
