

COURSES

With a combination of accounting courses and core business curriculum from the economics, marketing, management, and finance departments, our program will train you to be both an effective accountant and a business leader.

Tax Accounting I

This course examines the concepts and methods of determining federal income tax liability for individuals. Topics emphasized include personal deductions, capital gain and loss provisions, and accounting methods.

Principles of Financial Accounting

This course is designed to introduce students to accounting in a way that demonstrates the importance of accounting to society and the relevance of accounting to their future careers. The objective of the course is for students to understand the essential financial components of businesses and to realize that accounting information is imperative in the decision making process of investors, creditors, management, and others.

Strategic Cost Management

This course emphasizes contemporary topics in strategic cost management through an understanding of the underlying concepts and fundamental techniques involved in cost accounting for manufacturing and service companies. Job-order, process, and standard costing are examined. Emphasis is on how cost management systems, with their performance evaluation and reward systems, encourage efforts to achieve an organization's strategic goals.
